

VIKRAM KUMAR

Full Stack Developer (MERN Stack)

Gurgaon, India | +91 8595422784 | vikramcodes0@gmail.com | linkedin.com/in/vikram-kumar-55890027a | github.com/vikramKumar-code

PROFESSIONAL SUMMARY

Full Stack Developer (MERN) pursuing a BCA (Computer Applications), with hands-on training through a 250+ hour intensive bootcamp and four end-to-end deployed projects spanning e-commerce, task management, and CRM domains. Built and shipped applications using MongoDB, Express.js, React.js, Node.js, and TypeScript, with working experience in JWT authentication, role-based access control, Stripe payment integration with webhooks, RESTful API design, and basic data structures & algorithms. Comfortable collaborating with product, design, and engineering teams, and eager to learn production-grade practices under the mentorship of experienced developers. Seeking a MERN Stack Developer Internship to contribute to real-world features on a fast-growing engineering team.

EDUCATION

Bachelor of Computer Applications (BCA) — Final Year (Expected Graduation: 2026) Coursework: Data Structures, DBMS, Web Technologies, OOP, Computer Networks

Full Stack Web Development Bootcamp — Webigeeks, Gurgaon 2025, Offline

250+ hours of hands-on training in full-stack web development, REST API design, and database management

12th Standard — HBSE — 73% | 10th Standard — HBSE — 74%

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Redux/Context API, Tailwind CSS, Bootstrap, Responsive Web Design

Backend: Node.js, Express.js, MVC Architecture, RESTful API Design

Database & Caching: MongoDB, Mongoose ODM, Redis, Schema Design & Indexing, Aggregation Pipelines

Auth & Payments: JWT Auth, Session-based Auth, Role-Based Access Control (RBAC), Rate Limiting, Stripe Payment Integration, Webhooks

AI & Third-Party APIs: Google Gemini API Integration

Tools & DevOps: Git, GitHub, Postman, VS Code, npm, Vercel, Render, Docker

Practices: SDLC, Data Structures & Algorithms (Basics), Debugging, Cross-Browser Compatibility, Agile/Scrum Basics, Problem Solving

PROJECTS

Shopster — Full-Stack E-Commerce Platform

React.js · Node.js · Express.js · MongoDB · JWT · Stripe · Webhooks

[Live Demo](#) | [GitHub](#)

- Collaborated as a contributor on a full-stack e-commerce platform, owning the payment, cart, product, and order management modules end-to-end.
- Integrated Stripe payment gateway with webhook-based order confirmation, enabling secure checkout for real transactions.
- Built a real-time shopping cart with add/update/remove operations synced to MongoDB, supporting persistent sessions across page reloads.
- Designed product listing and order management APIs handling filtering, pagination, and status tracking across the purchase workflow.
- Developed an admin panel for product, order, and platform management, used to control inventory and monitor sales activity.

Student Task Management System

React.js · Node.js · Express.js · MongoDB · JWT · Bootstrap · 2025

[Live Demo](#) | [Full Stack Code](#)

- Built a full-stack task management platform enabling students to create, organize, and track assignments across separate Admin, Teacher, and Student dashboards.
- Implemented JWT-based, role-based authentication with protected routes controlling access to 3 distinct user roles.
- Designed RESTful APIs for tasks, deadlines, and progress tracking, backed by a normalized MongoDB schema linking users, tasks, and submissions.
- Added due-date reminders and status labels (Pending, In Progress, Completed) to improve task visibility and reduce missed deadlines.
- Deployed frontend on Vercel and backend API on Render as a fully hosted production environment.

Lead Desk Mini — CRM-Style Lead Management App

React.js · Node.js · Express.js · MongoDB · JWT · Bootstrap · 2025

[Live Demo](#) | [Frontend Repo](#) | [Backend Repo](#)

- Built a mini CRM application to capture, organize, and track sales leads through a multi-stage pipeline (New, Contacted, Qualified, Closed).
- Implemented JWT-based authentication to secure access to lead records and dashboard routes.
- Developed RESTful APIs for creating, updating, and querying lead records, with server-side filtering by pipeline stage.
- Designed an intuitive dashboard UI for visualizing leads across pipeline stages, improving lead tracking clarity.
- Deployed frontend on Vercel and backend API on Render.

AI ChatBot — Gemini-Powered Chat Application

React.js · TypeScript · Bootstrap · Node.js · Express.js · MongoDB · Redis · Docker · JWT · Gemini API

[Live Demo](#) | [Frontend Repo](#) | [Backend Repo](#)

- Built an AI-powered chatbot application integrating Google's Gemini API to generate real-time, context-aware conversational responses.
- Implemented JWT-based authentication to secure user sessions and protect chat history.
- Used Redis to implement rate limiting, preventing API abuse and ensuring fair usage across users.
- Containerized the application with Docker for consistent, reproducible deployment across environments.
- Designed MongoDB schemas to persist user conversations and chat history.
- Built a responsive chat interface using React.js, TypeScript, and Bootstrap for a smooth user experience.

KEY STRENGTHS

Full Stack Development • REST API Design & Integration • Payment Integration (Stripe) • JWT Authentication & RBAC • Redis & Rate Limiting • Docker Containerization • AI API Integration (Gemini) • Data Structures & Algorithms (Basics) • Responsive UI Development • Version Control (Git/GitHub) • Cloud Deployment (Vercel & Render) • Debugging & Problem Solving
